

# RCPA Telehealth Member Survey

June 2020

# Telehealth Survey Overview

- The survey was designed to measure the impacts of telehealth operations during the COVID 19 pandemic.
- The data and outcomes will contribute to our efforts to create a sustained platform for the delivery of telehealth services.
- The survey outcome and your feedback will be presented as part of RCPA efforts with our stakeholder community for the support and expansion of telehealth
- The survey results represent responses from more than 125 RCPA member organizations across the continuum of service including Adult and Children's Mental Health, Drug and Alcohol , and Residential Services.
- More than 300 individual respondents provided feedback to each survey question.

Did you  
provide  
Telehealth  
services prior

# RCPA Telehealth Survey Highlights

- 99% of respondents provided telehealth during pandemic as opposed to only 31% prior.
- More than 75% of respondents believed telehealth improved access for patients in need of service.
- More than 90% of patients and practitioners reported good experiences while using telehealth.
- More than half of respondents agreed that telehealth decreased the time from referral to first day of service.
- Most barriers to telehealth were attributed to use of technology & access issues.
- Telehealth practitioners reported high levels of success across multiple service features.
- Staff delivering telehealth reported several benefits including, increased client access, work life balance and achievable levels of productivity.
- 99% of respondents felt telehealth should continue to be a viable, reimbursable service once COVID-19 is over.

# RCPA Telehealth Recommendations

- Create a Telehealth Services platform as an alternative and/or supplement to face-to-face services.
- Equate the rate of reimbursement to the rate for services delivered in person.
- Ensure HIPPA standards meet practitioners needs to deliver services.
- Prohibit restrictions on location or setting of the provider's distant site.
- Allow providers to use any electronic or technological platform if it allows the provider to meet the same standard of care as an in-person visit and complies with federal privacy rule requirements.
- Establish a process guideline for documenting client signatures and other necessary case documentation.
- Develop solutions and funding for the technological challenges or barriers to telehealth.
- No session time restrictions based upon client need and treatment goals.
- Develop a Value Based funding approach like the alternative pay arrangements during the pandemic.
- Creation of a standardized data collection process.
- Establish certified training curriculums for providers on topics related to telehealth.
- Continue to study the impact of telehealth services across behavioral health disciplines.
